EDUCATION

Bannari Amman Institute of Technology

Bachelor of Engineering in Computer Science and Engineering

CGPA: 8.29/10

Sathyamangalam, Tamil Nadu

Aug. 2024 – Present

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, Python, C/C++, SQL (PostgreSQL, MySQL), HTML/CSS

Backend: Node.js, Express.js, FastAPI, REST APIs

Frontend: React, Tailwind CSS

Databases: PostgreSQL, MySQL, MongoDB, SQLite, Redis

Cloud & DevOps: AWS (EC2, S3), Docker, Kubernetes, Helm, GitHub Actions, Prometheus, Grafana

Developer Tools: Git, Linux (Ubuntu), Prisma ORM, Postman, VS Code

PROJECTS

Humming Tone | *TypeScript, Node.js, Express, PostgreSQL, Redis, Docker, AWS* [GitHub](#)

- Developed a production-ready e-commerce platform for a freelance client with secure authentication, RBAC, and an admin management dashboard.
- Integrated secure payment gateway and automated order processing workflows.
- Designed scalable backend architecture using Redis caching, modular services, and optimized database queries.
- Implemented inventory, product, order, coupon, and user management with role-based access control.

DB Backup CLI | *TypeScript, Node.js, PostgreSQL, MySQL, MongoDB, SQLite, AWS S3, Docker* [GitHub](#)

- Built a cross-platform CLI utility supporting automated backup and restore operations for PostgreSQL, MySQL, MongoDB, and SQLite.
- Implemented automated scheduling, compression, checksum verification, AWS S3 integration, and backup metadata management.
- Designed a modular storage provider architecture supporting local and cloud backup destinations.
- Integrated GitHub Actions, Dependabot, CodeQL, logging, and automated testing for CI/CD and code quality.

Plantera | *React, Node.js, Express, Python, Mapbox, Tailwind CSS, Machine Learning* [GitHub](#)

- Developed a real-time environmental monitoring platform for deforestation detection using satellite imagery and machine learning.
- Built an interactive dashboard featuring geographic visualization, trend analytics, and deforestation hotspot mapping.
- Integrated React frontend with Node.js backend APIs and Python-based ML models for image analysis.
- Implemented responsive UI with Mapbox, Tailwind CSS, and data visualization components for environmental insights.

EXPERIENCE

Web Developer

Students Special Group

Feb. 2025 – Dec. 2025

Student Organization

- Developed backend services using Node.js and MySQL to support core academic platform functionalities.
- Designed normalized relational database schemas to improve data integrity, scalability, and maintainability.
- Designed and implemented RESTful APIs for user management, authentication, and academic workflows.
- Collaborated with cross-functional teams to translate functional requirements into scalable backend solutions.
- Mentored 50+ students in JavaScript, backend development, and software engineering best practices.

ACHIEVEMENTS

- Solved **1000+** DSA problems on **LeetCode**, demonstrating strong algorithmic and problem-solving skills.
- Secured **1st Place** at the **IEEE DevSpark Hackathon** hosted by **KPR Institute of Engineering and Technology**.
- Won the **BIT Hackathon** by developing a full-stack application under time constraints.
- Finished as **Runner-up** at the **SNS Ideathon**.
